EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: Before "Field of the invention" on p. 1 of the specification, the following sentence was inserted.

--The present application is a 35 U.S.C. 371 national stage entry of PCT/EP04/02191 filed on March 4, 2004.--.

2. The following is an examiner's statement of reasons for allowance: The prior art does not disclose nor render obvious all the cumulative limitations of claim 1 with particular attention to a means for detecting ascorbic acid or a salt thereof with the specified first and second zones where the first zone has a means for buffering the sample to a pH of 5.5-8 and the second zone receives sample which passed through the first zone and is buffered to a pH from 1 to 5. Claims 2-14 depend from claim 1 and are also thereby allowable.

3. The International Preliminary Report indicated that the claims were not free of the prior art in view of the combined teachings of Ogawa et al (USP 4,303,409), Kim et al (USP 4,303,408), and Fader (USP 3,771,964). The examiner does not believe these references taken solely or together disclose or render obvious the claimed invention. Ogawa and Fader are drawn to ascorbic acid tests where the sample is exposed to a single pH range that has been optimized to avoid the adverse effect of uric acid in the sample. There is no suggestion in either of these

Art Unit: 1795

teachings that the interference removal and measurement could be done at two separate pHs with two separate zones. Although Kim is drawn to removing interferent contributions with at least one embodiment drawn to the use of two different zones, Kim does not teach or suggest a zone having a different pH range for removal of the interferent.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KAJ K. OLSEN whose telephone number is (571)272-1344. The examiner can normally be reached on M-F 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam X. Nguyen can be reached on 571-272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
